Skill note: policy-funding-card

CHEUNG Yuk Yuen, AI Application Trainee, Department of Physics.

Skill: policy-funding-card. Trigger: "policy-funding-card", "policy address" or "施政報告" with one address.

Use it when a new Policy Address is published and the question is which industries get a stated sum, whether the sum is new, and what their IPOs did afterwards.

Do not use it without the official text, for a forecast, or to replace an HKEX figure with a newspaper one.

Second run: the 2022 address alone. It found HK$40,000.0 million of new money and marked the HK$5 billion Strategic Tech Fund as already in place.

Its window, 19 Oct 2022 to 24 Oct 2023, shows life and health at 17.4% of Main Board IPO funds and no new-energy IPO by the name screen.

Worked: the run kept the 2026 HK$1 billion venture-fund amount out of the 2022 card.

Failed first: industries were matched only on HKEX's ten-largest IPO list, and money announced before an address counted as new.

Changed: the skill now reads every IPO in the New Listing Reports from the delivery date, and records each funding verb as a status.

Run 1 and run 2 side by side

	Run 1: 2026 address	Run 2: 2022 address
New money in the address	HK$1,300.0 million	HK$40,000.0 million
Already in place	HK$2,000.0 million	HK$5,000.0 million
Window after delivery	16 Sep 2026 to 29 Sep 2026 (14 days)	19 Oct 2022 to 24 Oct 2023
Main Board IPOs in the window	6, HK$20,708.6 million	79, HK$47,269.0 million

Run 2: the 12 months before the 2022 address and the window after, HK$ billion
