Assignment 1: Policy Address funding and the market in the following year

CHEUNG Yuk Yuen, AI Application Trainee, Department of Physics. 7 October 2026.

1. The task

I am CHEUNG Yuk Yuen. The reader is someone who wants to check public documents. The task covers the Policy Addresses after John Lee took office on 1 July 2022, through 16 September 2026. For each address I record which industries the Government funds with a stated amount, and what HKEX recorded in the following calendar year. A figure with no source is marked not stated in source. Two official figures that differ are both kept. The share of stated funding to later IPO funds is a size comparison. It is not a claim that the address caused the total.

2. How I did it

On 7 October I set the outcome window before opening the files: the calendar year after the address. The year of the speech is only the baseline.

I read AGENTS.md and memory/PROFILE.md. The name on the work is CHEUNG Yuk Yuen. University, degree, and contact details stay blank because the source assignments do not state them.

The Policy Address PDFs have no text layer here. I used the Chief Executive's Office English XML, pa2022.xml through pa2026.xml.

I checked the HKEX PDFs that have a text layer and copied the figures into the Google Sheet HKEX original market figures. The 2024 annual statistics supply the year after the 2023 address in the same HK$ million series as 2022 and 2023.

policy-funding-card extracts one address at a time. I ran it again on 2022 alone. That run pairs the 2022 funds with the 2023 market, and it does not pick up the extra HK$1 billion named in 2026.

better-writing rewrote only the influence paragraph. Amounts, dates, and labels stayed in the draft.

The workbook stores printed amounts in blue input cells. Conversion to HK$ million, the yearly funding sum, and the funding-to-IPO share are formulas. LibreOffice recalculated them.

3. Course concepts

Concept	How I used it	What changed
Plan Mode	The outcome window was fixed before any card was written.	The same year's HKEX total stayed a baseline.
AGENTS.md	Missing facts stay not stated in source. Differing official figures are both kept.	286.9 and 286.8 were not averaged. 2027 has no invented total.
Skills	policy-funding-card extracts one year. better-writing edits the paragraph only.	The 2022 rerun did not copy a 2026 amount.
Memory	Only the identity stated in the earlier assignments.	No university, degree, or Chinese personal name was added.
MCP	HKEX figures sit in a Google Sheet, separate from the funding rows.	The following-year comparison has its own tab.

4. Result

Card: A1_CHEUNG_Yuk_Yuen/outputs/term_funding_card.md. Sheet: https://docs.google.com/spreadsheets/d/1Nr4XOrgmN3wJ44HHLVwDYQaRkt7oi6D_qz0EIGy9lJ0/edit. Workbook: outputs/term_market.xlsx, sheet Year_after and the chart on Chart_data.

Life and health: Kelun-Biotech raised HK$1.56 billion in 2023. HKEX prints no biotech count for 2023 or 2024. In 2025 it records 16 Biotech Companies. With five Specialist Technology Companies they raised HK$19.8 billion, against the Listing Committee's IPO total of HK$285.8 billion. HengRui Pharma raised HK$11.4 billion and is not added to that sum.

AI and robotics: Horizon Robotics raised HK$6.09 billion in 2024 and RoboSense HK$1.06 billion. There were three Chapter 18C listings. In 2025 the Listing Committee names Hesai, WeRide and Pony AI and does not print their proceeds. New energy: REPT BATTERO Energy HK$2.12 billion and Sino-Synergy Hydrogen Energy HK$1.56 billion in 2023. Contemporary Amperex Technology is named in 2025 without a proceeds figure. Semi-conductors, advanced materials, film, aerospace and construction have no industry total in the outcome window.

Self-check: a company is tagged with an industry only when the HKEX page's name says so, or when the Listing Committee names the category. The board IPO change is the denominator. The HK$10 billion Industry-Oriented Fund was still expected to launch in 2026.

Following-year window

Address	Delivered	Outcome window	Label
2022	2022-10-19	2023 full year	following year recorded, source does not attribute it to the address
2023	2023-10-25	2024 full year	following year recorded, source does not attribute it to the address
2024	2024-10-16	2025 full year	following year recorded, source does not attribute it to the address
2025	2025-09-17	2026, first eight months	following year only partly published
2026	2026-09-16	2027 not published	following year not yet published

HKEX outcome figures

Year	Item	Value	Change	What it measures
2023	IPO, HK$ million	46,294.9	-55.8%	Year after the 2022 address
2023	ADT, HK$ million	105,012	-15.9%	Year after the 2022 address
2024	IPO, HK$ million	87,477.8	+88.9%	Year after the 2023 address
2024	ADT, HK$ million	131,825	+25.5%	Year after the 2023 address
2025	IPO, HK$ billion	286.9	+226%	Year after the 2024 address
2025	Headline ADT, HK$ billion	249.8	+90%	Year after the 2024 address
2026	IPO, 8 months, HK$ billion	342.4	+153%	Part of the year after the 2025 address
2026	ADT, 8 months, HK$ billion	282.5	+14%	Part of the year after the 2025 address
2027	IPO and ADT	not stated in source		Year after the 2026 address

Policy industry in the following year

Industry	After	Evidence	Amount
Life and health	2023 full year	Sichuan Kelun-Biotech Biopharmaceutical, ten largest IPOs	1.56 HK$ billion
New energy	2023 full year	REPT BATTERO Energy, ten largest IPOs	2.12 HK$ billion
New energy	2023 full year	Sino-Synergy Hydrogen Energy Technology, ten largest IPOs	1.56 HK$ billion
AI and robotics	2024 full year	Horizon Robotics, ten largest IPOs	6.09 HK$ billion
AI and robotics	2024 full year	RoboSense Technology, ten largest IPOs	1.06 HK$ billion
Specialist technology	2024 full year	Chapter 18C listings	3 companies
New economy, wider than the policy list	2024 full year	Share of capital raised	almost 82%
Life and health	2025 full year	Biotech Companies listed	16 companies
Specialist technology	2025 full year	Specialist Technology Companies listed	5 companies
Life and health plus specialist technology	2025 full year	Funds raised by the 16 biotech and 5 specialist technology listings	19.8 HK$ billion
Life and health	2025 full year	HengRui Pharma, H-share listing	11.4 HK$ billion
New energy	2025 full year	Contemporary Amperex Technology, named among the largest IPOs	not stated in source
AI	2025 full year	Hesai, WeRide and Pony AI, named as homecoming listings	not stated in source
Semi-conductors	2025 full year	No semiconductor IPO total	not stated in source
Advanced materials	2025 full year	No advanced-materials IPO total	not stated in source
Film and creative industries	2024 full year	No film IPO line	not stated in source
Aerospace	2026, first eight months	No aerospace IPO line	not stated in source
Construction	2027 not published	No construction IPO line	not stated in source

Chapter 18C from its effective date

Chapter 18C took effect on 31 March 2023. Listings under it before that day were zero. The first listing was XtalPi on 13 June 2024. By end-March 2026, HKEX records 14 companies and HK$28.4 billion. The rows sum to HK$28,435 million. HK$19,518 million of that is in the first quarter of 2026. The HK$10 billion I&T; Industry-Oriented Fund has no disbursement date in the 2026 address, so it is not counted here.

Year	18C listings	18C funds, HK$ m	Base Rate	Southbound ADT	Board IPO, HK$ m
2022	0	0	4.75%	31.7	104,570.3
2023	0	0	5.75%	31.1	46,294.9
2024	3	2,903	4.75%	48.2	87,477.8
2025	5	6,014	4.00%	121.1	285,800
2026 to 31 Mar	6	19,518	not stated	not stated	not stated

The count leaves zero on 13 June 2024, fourteen months after the rule. The large block of money is in the first quarter of 2026, after the Base Rate had been cut to 4.00% and Southbound ADT had reached HK$121.1 billion. HKEX attributes the 2025 rebound to global IPO demand, frontier technologies, and local market reforms. Biotech, under Chapter 18A since 2018, had 20 new listings in 2021, 8 in 2022, and 16 in 2025.

Programmes with a stated amount

Year	Programme	Amount	Industries
2022	Co-Investment Fund	30 HK$ billion	Enterprises setting up in Hong Kong
2022	RAISe+ Scheme	10 HK$ billion	University research teams with potential to become start-ups
2022	Strategic Tech Fund	5 HK$ billion	Life and health technology, AI and data science, advanced manufacturing and new energy technology

Year	Programme	Amount	Industries
2023	New Industrialisation Acceleration Scheme	10 HK$ billion	Life and health technologies, AI and data science, advanced manufacturing, new energy technologies
2023	Film Development Fund and CreateSmart Initiative	4.3 HK$ billion	Film, cultural and creative industries
2024	Research Matching Grant Scheme	1.5 HK$ billion	Research at institutions
2024	I&T; Industry-Oriented Fund	10 HK$ billion	Life and health technology, AI and robotics, semi-conductors and smart devices, advanced materials, new energy
2024	Innovation and Technology Venture Fund	1.5 HK$ billion	Start-ups in strategic industries
2024	I&T; Accelerator Pilot Scheme	180 HK$ million	Start-up accelerators
2024	New Energy Transport Fund	750 HK$ million	Electric taxis and franchised buses, hydrogen fuel-cell heavy vehicles
2025	Frontier Technology Research Support Scheme	3 HK$ billion	AI and other frontier research
2025	Hong Kong AI Research and Development Institute	1 HK$ billion	AI research, transfer, and use cases
2025	Aerospace Technology special call	100 HK$ million	Aerospace technology
2026	Innovation and Technology Venture Fund, enhanced scheme	1 HK$ billion	I&T; venture funds
2026	Artificial Intelligence Subsidy Scheme	1 HK$ billion	High-performance computing for the AI institute
2026	AI for Welfare Lab	300 HK$ million	AI in social welfare services
2026	Construction Innovation and Technology Fund	1 HK$ billion	I&T; in the construction industry
